

## EDUCATION

---

- **University of Waterloo** Ontario, ON  
*Candidate For Honours Bachelor of Computer Science; GPA: ??* Sept 2021 – Apr 2026
  - **Coursework:** Algebra (Advanced) (??%), Calculus (Advanced) (99%), Designing Functional Programs (Advanced) (98%)

## AWARDS/COMPETITIONS

---

- **Canadian Computing Competition (Senior Division) & Olympiad** Waterloo, ON  
*National algorithms competition* Feb 2018 – Feb 2021
  - Silver Medalist at the 2021 Canadian Computing Olympiad, an invite-only team selection test for the Canadian IOI team made up of top CCC participants
  - Placed 1st out of 2901 participants (with a perfect score) in the 2021 competition
- **Google Code Jam** Apr 2019 – Present  
*Major algorithms competition that gathered 90,000+ participants last year*
  - Placed 165th in Round 3 2021
  - Round 3 Qualifier in 2020 and 2021 (top 1,000 participants)
- **USA Computing Olympiad (Platinum Division)** Jan 2020 – Present  
*Placed 33rd out of all pre-college participants in the highest division of the USACO Open 2021*

## EXPERIENCE

---

- **Codeforces LATOKEN Round 1** Online  
*Organized algorithms competition with over 18,000 participants* May 2020 – June 2021
  - **Organization:** Worked with other problemsetters and Codeforces Administration to gather testers and ensure smooth delivery of competition
  - **Problemsetting:** Generated ideas for problems, prepared problem statements and test data, created programs to validate correctness of data and graders
- **DMOJ Problem Setter** Online  
*Organized and tested programming competitions* Sept 2019 – Present
  - **Mock CCC:** Problemsetter for two Mock CCC (Canadian Computing Competition) contests in 2020 and 2021
  - **CPC:** Organizer and problemsetter for 2020 and 2021 competitions
  - **Olympiads School:** Created tasks for computer contest quizzes held at the end of each term

## PROJECTS

---

- **CP Tools**  
*Python module for Competitive Programming*
  - Python module that contains a suite of tools for algorithms problems, including automated local testing, stress testing tools, and integration with browser extensions
  - Formerly a VSCode extension written in TypeScript with Vue and the VSCode API with similar functionality
- **Algorithms & Data Structures Library**  
*60+ DSA templates built to be easily integrated into existing solutions*
  - Includes a variety of algorithms: graphs, strings, data structures, combinatorics and number theory, etc.
  - Testing integration with GitHub actions and `online-judge-tools/verification-helper` to ensure correctness
- **LetterGrid**  
*Head-to-head online multiplayer game made for Hack the North 2021*
  - Typing-based strategy game where players race to opposite corners of a grid while blocking opponents
  - Built using React for the UI and Flask on the backend

## PROGRAMMING SKILLS

---

- **Languages:** Python, C/C++, HTML/CSS/JS, Java
- **Technologies:** Django, React, Flask, LaTeX
