Education

• University of Waterloo

Sep 2021 – Apr 2025 (Anticipated)

Honours Bachelor of Computer Science; cGPA: 95.10%

- **Coursework:** Object Oriented Programming, Foundations of Sequential Programs, Data Structures, Statistics, Linear Algebra, Combinatorics
- **Scholarships:** Faculty of Mathematics Scholarship, President's Scholarship of Distinction

Skills

- **Languages:** C, C++, Python, Java, Rust, Scala, JS, TS, Bash, Kotlin
- **Tools/Frameworks:** DPDK, GDB, Docker, Nginx, Git, Django, Flask, Node, Express
- **Platforms:** Windows, Linux, Google Cloud Platform

Experience

• Huawei – Network Engineering Intern

May 2023 – Present

Engineering software for high-throughput, low-latency data transfer in file storage networks (C, DPDK)

- Creating a UDP socket library on top of DPDK, with up to 18x speed improvement over Linux kernel sockets
- Developing a transport protocol to ensure reliable data delivery over UDP while maintaining performance

• AMD – Software Engineering Intern

May 2022 – Aug 2022

Developed and maintained driver debugger for 200+ KMD developers across AMD (C++, Python)

- Added feature to inspect hardware scheduled queues, enabling debugging of critical launch-gating issues
- Proposed and implemented improvements used across unit (GTest, GMock) and CI test infrastructure, reducing test code size by up to 50%
- Automated formatting of tables, nested lists, and dictionaries, ensuring consistent debugger output and deduplication of formatting code

• WePlate 🍴 – Backend Engineer

Jan 2022 – June 2022

Designed, developed, and deployed backend system for nutritional insights (Python, Django)

- Processed and served 10,000+ cafeteria scheduling and nutritional items using Django REST Framework
- Implemented Simulated Annealing algorithm to autogenerate portion sizes optimized for nutritional value
- Deployed project as scalable webservice using GCP AppEngine and CloudSQL

Awards/Competitions

- **ICPC ECNA Regionals:** Represented Waterloo in 2021 and 2022, placing 4th and 6th against 90+ other university teams
- **Putnam 2021:** Placed in the top 500 of the most famous University-level mathematics competition
- **Google Code Jam 2021:** Placed 3rd of Canadian contestants (165th overall) in third round of international algorithms competition with 90,000+ participants
- **CCC & CCO 2021:** Placed 1st out of 2,900+ participants at Canada's most prestigious high school programming contest (CCC), qualifying for the CCO (top ~40 CCC) and achieving a silver medal

Projects

- **C++ Game Engine:** Designed and implemented object-oriented (OOP) game engine built around the MVC pattern. The engine supports handling a variety of entities with built in entity movement, collision detection, and a graphics library
- **Competitive Programming Tools 🐍 🐘:** Tools that greatly speed up implementation and debugging during programming contests. Includes automated local testing, stress testing, and browser integration. Available as a Python CLI or VSCode extension (TypeScript and React.JS)
- **LACS Compiler:** Scala-based compiler for functional language targeting MIPS. Includes support for closures, nested functions, static typing, garbage collection, and tail-call optimization
- **Minecraft Server Plugins:** Used Java, Kotlin, and the Spigot API to add features such as KitPVP mechanics, custom bosses, and hats
